ARTICLE-X
RIGHT OF ACQUISITION OF PETROLEUM

- 10.1 Should THE PRESIDENT require the Working Interest Owner(s) to meet the internal requirements of Pakistan according to Rule 40 of the Rules, the following shall apply:
- i) If in any year there is Projected Domestic Demand in excess of production from indigenous source, THE PRESIDENT may require Working Interest Owner(s) to sell Crude Oil in Pakistan on a pro-rata basis with other producers in Pakistan, according to the Crude Oil production of each producer in a year. The President shall give the Working Interest Owner(s) at least three Months notice in advance of such requirements and term of the supply will be on an annual basis.
 - ii) Whenever a Working Interest Owner is selling Crude Oil to THE PRESIDENT or his designee such Working Interest Owner shall be entitled to receive a price in US \$ per barrel, (subject to Article 10.3) for such Crude Oil delivered at its cost to the nearest operating refinery which shall be calculated as under:
 - a)
 - 1) The arithmetic average of the FOB spot prices during the Month of delivery of a basket of Arabian/ Persian Gulf Crude Oils or a Crude Oil comparable in quality to Crude Oil produced under this Agreement as mutually agreed; or
 - 2) In the event no agreement is reached as to the basket or a comparable Crude Oil or on related matters then the basis shall be FOB market price of a Crude Oil as may be mutually agreed which can be demonstrated to be applicable to contracts negotiated with unrelated parties for Arm's Length Sales under which the consideration is wholly cash, payable on normal commercial terms.
 - b) Plus freight for marine transportation of Crude Oil from Ras Tanura to Karachi as applicable from time to time for chartered vessels.
 - c) Plus or minus a quality yield differential between Crude Oil produced under this Agreement and the Crude Oil referred to in Article 10.1 (ii) (a) above. For this purpose the differential shall be determined on yield value based on refinery operating conditions where the Crude Oil will be processed and at mutually agreeable reference prices of Petroleum products prevailing in the Arabian/Persian Gulf and published in an internationally recognized publication acceptable to the Parties.
- 10.2
- a. Working Interest Owner(s) will be allowed to contract with Natural Gas transmission and distribution companies and third parties, other than residential and commercial consumers, for the sale of their share of Natural Gas in Pakistan at negotiated prices in accordance with applicable laws, rules and regulations.
 - b. Subject to the considerations of internal requirements and national emergencies, Working Interest Owner(s) will be allowed to export their share of Crude Oil and Condensate as well as their share of Natural Gas based on export licences to be granted by the concerned regulator. For the purpose of

the grant of such export licenses for Natural Gas, the export volumes will be determined in accordance with “L15” concept provided a fair market value for such gas is realized at the export point. Under the “L15” concept the Natural gas reserves that exceed the net proven Natural Gas reserves in Pakistan including the firm import commitments vis-à-vis Natural Gas Projected Domestic Demand for next fifteen years can be considered for export. Once Natural Gas has been dedicated for exports, licenses for such export volumes shall not be subsequently revoked.

- c. If the foreign Working Interest Owners sell Natural Gas to third parties in Pakistan and want to remit sale proceeds in foreign currency abroad, Government shall allow such Working Interest Owners to freely remit a “guaranteed percentage” of their sale proceeds provided the Natural Gas prices are equal to or less than 67.5%, 72.5% or 77.5% for Zone-III, Zone-II and Zone-I respectively of C & F price of a basket of imported Arabian/Persian Gulf Crude Oils (Applicable Price) with following floor and ceiling:

Floor and ceiling will be US\$ 10/barrel and US\$ 36/barrel of C&F price, respectively with following discounts:

Over US\$10/barrel and upto US\$16/barrel: 100% Applicable Price

Over US\$16/barrel and upto US\$21/barrel: Plus 50% of incremental Applicable Price

Over US\$21/barrel and upto US\$26/barrel: Plus 30% of incremental Applicable Price; and

Over and above US\$26/barrel upto the ceiling: Plus 20% of incremental Applicable Price.

The “guaranteed percentage” shall be 75% of the total gross revenues from any Lease in Zone I, 70% in Zone II and 65% in Zone III. The remaining gross income in Rupees can be used to pay royalties, taxes and any other payments to the Government as well as to meet local currency expenditures.

- d. At the request of Working Interest Owner(s), Government shall purchase their share of Natural Gas of acceptable pipeline specification gas through a nominated buyer which is effectively controlled by it (Nominated Buyer) in acceptable Daily, Monthly and Yearly volumes to meet the internal demand in an economical manner. The delivery point shall be the nearest transmission system (Delivery Point). Government shall pay, as per the existing guidelines, the price for such Natural Gas at the Delivery Point adjusted for the floor and discounts as provided for in Sub-Article (f) (Policy) together with a gas transmission tariff as provided in Sub-Article (e). In addition, the same "guaranteed percentage" for foreign exchange remittance as contained in Sub-Article (b) above will apply to such sales.
- e. Where a Nominated Buyer agrees in principle to purchase Natural Gas pursuant to Article (d) above, the Working Interest Owner(s) shall construct and operate the Natural Gas pipeline connecting the field to the Delivery Point for which transmission tariff will be payable as approved by the concerned regulator in accordance with applicable laws, rules and regulations. Furthermore, the Working Interest Owner(s) can arrange for the construction and operation of the connecting Natural Gas pipeline through an independent third party for which the producer will invite sealed bids on BOOT basis. At

the request of the Working Interest Owner(s), the Nominated Buyer for purchase of the Natural Gas can also consider the laying of such pipeline from field gate to the nearest transmission system at its own cost. In the latter two cases, the delivery point of gas will be field gate and transportation tariff payable to the third party or the Nominated Buyer as the case may be, will also be determined by the concerned regulator. If an inter-connecting pipeline is proposed to be constructed by a third party or the buyer, the Working Interest Owner(s) will be required to confirm the requisite Natural Gas supply volumes on "supply/take or pay" basis, pressures, reserves and other technical parameters on standard supply term contract basis for a period of not less than fifteen years. However, whether a connecting pipeline is constructed and operated by Working Interest Owner(s), a third party or a Nominated Buyer, such a pipeline shall be regulated, unless the concerned regulator decides that the pipeline shall be a non-regulated pipeline.

- f. Whenever a Working Interest Owner is selling pipeline quality Natural Gas of acceptable specification to nominated buyers, it shall subject to Article 10.3, receive a price per Million British Thermal Unit (MMBTU). The price to be paid to a Working Interest Owner shall be determined for a six (6) Monthly period (hereinafter referred to as "the Price Notification Period") starting at eight (8) a.m. P.S.T. on 1st January and 1st July each year except the first period which may commence from the start of Commercial Production till 30th of June or 31st of December as the case may be.

The price of acceptable pipeline quality Natural Gas to be notified per MMBTU shall be computed as follows:

- (1) First determine the "Marker Price " which shall be 67.5% for Zone III, 72.5% for Zone II and 77.5% for Zone I of the weighted average C&F price per barrel (based on quoted FOB prices) of the basket of Crude Oils imported into Pakistan during the first six Months period of the seven Months period immediately preceding the relevant Price Notification Period.

Apply following discounts to Marker Price,
Floor and ceiling will be US\$ 10/barrel and US\$ 36/barrel of C&F price, respectively with following discounts:

Over US\$10/barrel and upto US\$16/barrel: 100% Marker Price
Over US\$16/barrel and upto US\$21/barrel: Plus 50% of incremental Marker Price
Over US\$21/barrel and upto US\$26/barrel: Plus 30% of incremental Marker Price; and
Over and above US\$26/barrel upto the ceiling: Plus 20% of incremental Marker Price.

A sample of wellhead gas price illustration is at Appendix-B hereof.

- (2) Using the appropriate conversion factor, convert the discounted Marker Price to MMBTU rounding the quotient to four (4) decimal places to arrive at the Marker Price per MMBTU.

- (3) Not later than twenty (20) Days prior to the commencement of the Price Notification Period during which the Operator expects first Natural gas production to commence, the Operator shall submit to the Authority established under the Natural Gas (Price for Supplies by Producers) Rules, 1976 (hereinafter referred to as the "Price Determining Authority") a calculation of Marker Price in US Dollars to be fixed on the first Day of such Notification Period.
- (4) Thereafter, Operator shall submit to the Price Determining Authority the relevant Marker Price calculation in US Dollars (applicable to each six (6) Month Price Notification Period prior to each preceding 10th December and 10th June respectively.
- (5) THE PRESIDENT shall ensure that details of the quantities and C&F prices of the Crude Oils imported into Pakistan as referred to in Article 10.2(f)(1) hereof, are supplied to Operator not later than twenty five (25) Days prior to the commencement of the relevant Price Notification Period for the purpose of calculations to be made pursuant to Article 10.2(f)(1) & (2).
- (6) Operator shall submit to the Price Determining Authority a draft pricing notification setting out the US Dollar prices resulting from Article 10.2 (f)(1) & (2) above for the relevant Price Notification Period at the same time as submitting the calculation pursuant to Article 10.2(f)(3) & (4) above (as the case may be).
- (7) Such pricing notification shall be published in US Dollars in the official Gazette for the purposes of the Gas Sales Agreement within forty five (45) Days of the date of receipt of the aforesaid draft pricing notification.

g. Price of Natural Gas for Consumers will be adjusted biannually to synchronize with the changes in the producer prices.

10.3 For purchases of Condensate and LPG to meet internal requirements of Pakistan, the price payable to Working Interest Owner(s), subject to Article 10.4, shall be calculated as under:-

- a) The price in U.S. \$ per Barrel allowed for Condensate, delivered at the nearest operating refinery shall be equal to the FOB price of internationally quoted comparable Condensate as mutually agreed by the parties. No other adjustment or discount will apply.
- b) The price allowed for Liquefied Petroleum Gas produced from new projects will be determined by the market under a deregulated regime.

10.4 A windfall levy on Crude Oil/Condensate will be applicable using the following formula:

$$\begin{aligned} \text{Windfall Price Share} &= 0.5 (\text{Production-Royalty}) \times (\text{Market Price-Base Price}) \\ \text{WPS} &= 0.5 (P-R) \times (V-B) \end{aligned}$$

The base price will be \$ 30 per bbl, which will escalate at \$ 0.25 per barrel per year. Windfall price is based on 50% of the differential between the market price and base price.

- 10.5 THE PRESIDENT or his designee shall purchase Crude Oil and Condensate delivered at the "nearest operating refinery"; Natural Gas subject to Article 10.2, the nearest transmission system and LPG at a "point" as may be agreed. Title to and risk of loss of the Petroleum purchased by THE PRESIDENT or his designee shall pass at the transfer points referred to above which shall be construed as the "Delivery Points" for the purpose of this Agreement.
- 10.6 THE PRESIDENT or his designee shall pay to a Pakistani Working Interest Owner upto 30% of their sale proceeds in foreign exchange for all Petroleum purchases in accordance with the provisions of this Article-X, to meet their Day to Day operational requirements. For project financing after Commercial Discovery, Pakistani Working Interest Owner(s) will be required to make their own foreign exchange arrangements. The rate of exchange prevailing on the date of transaction except as specifically provided herein will apply. Payments for any Petroleum purchased from the foreign Working Interest Owner(s) by THE PRESIDENT or his designee shall be by remittance in United States Dollars to a bank designated by the foreign Working Interest Owner(s) of an equivalent amount to within 30 Days of receipt of invoice subject to the condition that in the case of sale of Natural Gas such guaranteed percentage as referred to in Article 10.2 (c) will be applicable. If not so paid, the unpaid balance shall bear interest after the due date at the rate of 1.5 percent per annum above LIBOR for one Month deposits of US Dollars as reported in an agreed publication.
- 10.7 In the event that THE PRESIDENT or his designee is unwilling to purchase all or a portion of any Working Interest Owner's share of Petroleum, such Working Interest Owner shall have the right to export or otherwise dispose of such Petroleum at competitive prices.
- 10.8 THE PRESIDENT shall have the right to purchase all or a portion of any Working Interest Owner's share of Petroleum in case of a national emergency or war.

- 8.4 The Working Interest Owner(s) recognize that, in the event of the production of Natural Gas and LPG, it may become or shall be desirable for them to enter into special arrangements for the disposal of the same and they agree that, in such event and upon the request of any of them, their respective representatives shall meet as necessary to consider their entry into such arrangements.

ARTICLE-9
SOLE RISK

- 9.1 As used in this Article 9, the terms set out below shall have the following meanings:
- 9.1.1 "Sole Risk Well" means a well other than a well included in Minimum Work Obligation specified in Article III of the Concession Agreement and drilled and completed by less than all the Working Interest Owner(s) hereto in accordance with the provisions of this Article 9, or such other limited well site operation as specified in Article 9.9.
- 9.1.2 "Location" means the geographic point at the surface being the vertical projection of the point where the well bore actually encounters the objective formation in the case of an existing well or where the well bore is expected to encounter the objective formation in the case of drilling well or a well included in the currently approved work programme and budget.
- 9.1.3 "Commercial Quantities" shall have the same meaning as the definition of "Commercial Production" in Article 1.11 of the Concession Agreement.
- 9.2 Any Party shall have the right, by complying with the terms of this Article 9, to drill any well within the Area, other than a well approved by the Operating Committee and included in the currently approved annual work programme and budget.
- 9.3 Any Working Interest Owner proposing to drill a Sole Risk Well shall give notice thereof ("Notice") to the other Working Interest Owner(s), specifying the Location (provided that such Location shall conform to any spacing pattern for the development drilling previously approved by the Operating Committee), the drilling operations to be conducted, and the objective formations.
- 9.4 Within thirty (30) Days after the receipt of the Notice, except as otherwise provided in Article 9.9 hereof, the Operator shall notify each Working Interest Owner of the Operator's detailed cost estimates with respect to the drilling of such well and the Operator's estimate of the date on which such well may be commenced without interfering with the execution of work programme thereto for approved by the Operating Committee ("Commencement Date"). The Operator's estimate shall include the total costs of all operations and equipment necessary for locating, drilling, testing, completing and equipping (including necessary flow lines and storage tanks) or abandoning said well.
- 9.5 Within forty-five (45) Days after receipt of the Notice, except as otherwise provided in Section 9.9 hereof, each Working Interest Owner shall elect whether or not to participate in drilling the proposed well by giving written notice to the other Working Interest Owner(s). Failure to give notice within such period of time shall be deemed to be an election by such Working Interest Owner not to participate in the drilling of such proposed well. An election to participate shall be deemed approval of the drilling of such well.
- 9.6 If less than all Working Interest Owner(s) elect to participate in the Sole Risk Drilling each Working Interest Owner electing to participate (hereinafter called "Drilling Party/Parties" whether one or more) shall have a Working Interest in such well in the proportion that its Working Interest bears to the total of the Working Interests of all

Drilling Parties, or in such other proportion as mutually agreed upon by the Drilling Parties.

This Joint Operating Agreement shall be divisible and shall apply independently in the manner of a separate contract for the drilling and operations of any Sole Risk Well. This Joint Operating Agreement shall cease to apply as an independent and separate contract with respect to a Sole Risk Well when Drilling Party has fully recovered the value referred to in Article 9.10 hereof.

- 9.7 The Drilling Party shall cause such well to be drilled as a Sole Risk Well at the sole cost and risk of the Drilling Party/Parties. The Working Interest Owner or Working Interest Owner(s) not electing to participate in the drilling of such well shall hereinafter be called "Non-Drilling Party", whether one or more. The Drilling Party/Parties may ask the existing Operator to Drill the Sole Risk Well or may Operate the Sole Risk Well itself and such new Operator shall be obligated to conduct all operations necessary for the drilling of a Sole Risk Well in accordance with the provisions of this Joint Operating Agreement, and the Operator's cost estimate by the Commencement Date; provided, however, that with respect to the drilling of a well where the Operator is a Non-Drilling Party, Drilling Party, may, within sixty (60) Days after receipt of the Notice as defined in Article 9.3 hereof, notify the existing Operator of the election by Drilling Party to conduct by itself all operations with respect to the drilling of such Sole Risk Well and the existing Operator shall be relieved of its obligations to conduct such operations in which case the Drilling Party shall conduct the operations itself as the new Operator.
- 9.8 In the event Drilling Party shall elect not to have the Operator drill the Sole Risk Well, the Drilling Party must cause the drilling of the Sole Risk Well to commence within six (6) months after the Notice. If the Drilling Party has not commenced the Drilling of such Sole Risk Well within the period specified, the Drilling Party shall not be entitled to commence the drilling of such Sole Risk Well until such time as a new Notice shall be given and the provisions of this Article 9 are again complied with.
- 9.9 If the Notice described in Article 9.3 relates to a well site operation such as proposed redrilling, sidetracking, deepening, reworking, testing or plugging back a well, such Notice shall be acted upon within 48 hours if the drilling equipment is on location. The Operator shall perform all redrilling, sidetracking, deepening, reworking, testing or plugging back operations in accordance with a Notice approved by all or less than all the Working Interest Owner(s) at the sole cost, and risk of the Working Interest Owner(s) who voted in favour of such Notice, which Working Interest Owner or Working Interest Owner(s) shall be deemed as "Drilling Party". The Working Interest Owner or Working Interest Owner(s) who voted against such Notices shall be deemed "Non-Drilling Party". If the proposed sole risk drilling operations consist of redrilling, sidetracking, deepening, reworking, testing or plugging back a well, the Drilling Party shall pay the Non Drilling Party's ownership interest in the salvage value of all equipment installed in said well as may be mutually agreed. The Drilling Party/Parties shall own all production resulting from such operations until the Drilling Party/Parties has fully recovered the value referred to in Article 9.10 hereof with respect to such operations. Only the Working Interest Owner or Working Interest Owner(s) who participate in the last operation with respect to a well shall bear the cost of abandonment. In the event of a disagreement between Drilling Party/Parties on the order and manner in which sole risk proposals of redrilling, sidetracking, deepening, reworking, testing or plugging back a well are to be undertaken, the matter shall be referred to the Operating Committee for a decision.

- 9.10 If any Sole Risk Well is drilled, it shall be operated by the Operator except as provided in Article 9.7 and if completed as a producing well, the Drilling Party/Parties shall own all of the production from such well and shall bear all the cost of operating such well until the Drilling Party has recovered from production an amount equal to the sum of :
- i) Eighteen Hundred percent (1800%) of what would have been the Non-Drilling Party's Working Interest share of costs of drilling such well to total depth, conducting such production tests as may be carried out with drilling equipment, equipping such well for production upto and including the Christmas Tree, such amounts to be recovered resulting from such well or wells or from the proceeds from the first sales of production resulting from the discovery of an accumulation of Petroleum by such well or wells; and
 - ii) Four Hundred percent (400%) of what would have been the Non-Drilling Party's Working Interest share of costs of all production facilities associated with production of petroleum from a Sole Risk Well down-stream from the Christmas Tree and necessary to handle, treat and bring production from such well to the point where such production is handled by such facilities which are to be used in common with production but not associated with such well or to the point of delivery of such production by the Operator to Drilling Party and shall include but not be limited to the flow lines and storage tanks required for handling production from such Sole Risk Well; and
 - iii) Two Hundred Percent (200%) of what would have been the Non-Drilling Party's Working Interest share of the costs and expenses incurred and paid by the Drilling Party for the operations of such well until such time as the Drilling Party is reimbursed as provided in paragraphs (i) and (ii) above; and thereafter such well shall be owned by all Parties hereto and each Party shall participate with respect thereto in accordance with such Party's Working Interest herein.
- 9.11 If a Working Interest Owner initially elects to participate in a Sole Risk Well and subsequently fails to timely meet its payments therefor as provided in the Accounting Procedure, then at the option of the other Working Interest Owner(s) constituting the Drilling Party(s) the provisions of this Article 9 shall apply as if that Working Interest Owner were a Non-Drilling Party.
- 9.12 The Working Interest Owner(s) comprising any Drilling Parties shall, in proportion to their respective Working Interests in the Sole Risk Drilling, indemnify the Non-Drilling Parties against all losses, damages and claims against them arising out of Sole Risk Drilling.
- 9.13 The Drilling Party shall be entitled to use for Sole Risk Drilling any data and information which they own jointly with a Non-Drilling Party. Data and information obtained in respect of Sole Risk Drilling shall be made available to the Non-Drilling Party but shall remain the property of the Drilling Party subject to the Rules and the Concession Agreement.
- 9.14 Drilling equipment owned by Working Interest Owner(s) or under contract to the Operator and being used in operations hereunder may not be employed to drill a Sole Risk Well if such equipment is scheduled for other Joint Operations work unless approved by the Working Interest Owner(s). However, in the case of redrilling, sidetracking deepening, completing, plugging back, testing or reworking, said equipment

if on the drilling location, shall be used to carry out the desired operation unless agreed otherwise.

9.15 Notwithstanding the foregoing, if in the reasonable judgement of the Operator or a Working Interest Owner there is a substantial risk that the proposed operations would appreciably impair the present or potential future production from a producing oil or gas well, or well capable of production, the Operator or the Working Interest Owner shall so advise the other Working Interest Owner(s), stating the reasons substantiating its judgement and the proposed Sole Risk operations shall not be undertaken unless approved by all Working Interest Owner(s).

9.16 In the event that less than all the Working Interest Owner(s) participate in the development of a Discovery pursuant to the Concession Agreement, any non participating Working Interest Owner shall have the right to acquire a Working Interest in such development equivalent to its Working Interest hereunder by paying in cash an amount equal to one hundred and seventy-five percent (175%) of the amount which it would have paid had it participated in the development from the date of its failure to participate pursuant to the Concession Agreement. Such right shall be exercisable at any time up to one year from the date referred to above by payment of the sum mentioned in cash in full and shall be effective as of the date of such payment.

Any non participating Working Interest Owner which fails to exercise such right within the time period specified shall have no further right to elect to participate therein and the Lease relating to any such Discovery Area shall constitute a separate Lease Area and the Working Interests therein and the production of Petroleum therefrom shall be owned exclusively by the Working Interest Owner(s) participating therein.

9.17 Following approval of a Development Plan pursuant to Article VI of the Concession Agreement, any Working Interest Owner may request a review of the provisions contained in this Article 9 and if following such review all Working Interest Owner(s) agree that an amendment to such provisions is required, it shall be amended accordingly for submission to the Government.

The purpose of this Accounting Procedure is to establish equitable methods of determining charges and credits applicable to operations under the Joint Operating Agreement which will truly reflect the Operator's actual costs, to the end that the Operator shall neither gain nor lose in relation to the Working Interest Owners by reason of the fact that it acts as Operator. If at any time or from time to time, any such methods prove unfair or inequitable to Operator, or Non-operator(s), the Working Interest Owners will meet and in good faith endeavor to agree on changes in methods deemed necessary to correct any unfairness or inequity.

ARTICLE-I
GENERAL PROVISIONS

1. DEFINITIONS

The terms defined in Article I of the Concession Agreement and in Article I of the Joint Operating Agreement shall have those meanings wherever used in this Accounting Procedure and the following words and phrases shall have the meanings set forth against them below:

These statements shall include a detailed statement of all charges and credits to the Joint Account, summarized by appropriate classification indicative of the nature thereof and the unusual charges and credits. All records kept, and reports made, shall be in Pakistan Rupees and in United States Dollars. Transactions incurred in currencies other than Pakistan Rupees or United States Dollars shall be converted at the appropriate official rates of exchange.

3. PAYMENTS AND ADVANCES

Upon approval of any work programme and budget, the Operator will have the right on a current basis only, to make monthly advance cash calls to all Working Interest Owner(s) for the period covered by such work programmes and budgets. In the event of a Commercial Discovery, a monthly or other suitable time frame for cash calls and the procedures for such calls will be as

adopted or determined by the Operating Committee. Each such month cash call shall be equal to Operator's estimate of the actual money required by it to perform its duties under the approved work programme and budget therefor during the month concerned. Each such call shall be made in writing detailing the payments the Operator anticipates to be required during the period covered thereby, and shall be delivered or sent by telex / fax delivered personally to all Working Interest Owner(s) not later than 20 Days prior to the beginning of the month preceding the month when such Expenditures are to be made, and each Working Interest Owner hereto shall pay its Working Interest share of the full amount of each such cash call in cash, to the Operator not later than the first working Day of the month for which the funds are required, and if not so paid, the Working Interest Owner in default will pay an additional sum calculated on the unpaid balance at the rate of one and a half percent (1.5%) per month or any fraction of a month, until paid. If a Working Interest Owner is in default of payments due by it under the Joint Operating Agreement, the applicable provisions of the Joint Operating Agreement shall apply. Cash calls shall be increased or decreased, as required by the Operator, in order to adjust for payments made on behalf of the Joint Venture for services and materials furnished by the Operator or to replace any deficit or eliminate any surplus as the case may be, of the cash funds available in the Joint Account. Funds made available to the Operator on trust are for the account of the Non-Operators and shall not be subjected to any prior lien in favor of a third party. Subject to Article XII of the Concession Agreement, all payments by Pakistani Working Interest Owner(s) may be made in Pakistan Rupees irrespective of the currencies in which such costs and expenses are to be incurred and by foreign Working Interest Owner(s) in United States Dollars or any other currency in which Expenditures are incurred. Subject to the provisions of the Concession Agreement, the Operator shall have the right, at any time and from time to time, to use the joint funds or to convert the same or any part to other currencies to the extent that such currency is then required for operations, and the actual cost of currency loss or gain of any such conversions shall be charged or credited to the Joint Account. In the event Operator accumulates funds exceeding US Dollars Twenty Thousand (US \$ 20,000) or Pakistani Rupees Three Hundred and Fifty Thousand (Rs. 350,000) under this Accounting Procedure, Operator, if so requested by the Working Interest Owner(s), shall make appropriate refunds to Working Interest Owner(s) within five (5) calendar Days of determination of such excess funds. Such determination of excess funds shall be made every quarter and for this purpose any amount representing such excess as reflected in the Operator's monthly Expenditure statement shall be refunded by the Operator.

4. ADJUSTMENTS

Payments of any advances or cash calls shall not prejudice the right of any Non-Operator to protest or question the correctness thereof; provided, however, all reports and statements rendered to Non-Operators during any Calendar Year shall conclusively be presumed to be true and correct after a twenty-four (24) month period, unless a Non-Operator takes written exception thereto, and makes claims on the Operator for adjustment within such period. No adjustment favourable to the Operator shall be made unless it is made within the same prescribed period. The provisions of this paragraph shall not prevent adjustments resulting from a physical inventory of the Joint Property as provided for in Article V hereof.

5. AUDITS

- a) In accordance with Article XXII of the Concession Agreement, the Joint Account shall be audited for the period commencing with the Effective Date to December 31, 2006 and thereafter annually by one independent firm of Chartered Accountants, with the appropriate level of joint venture Petroleum auditing experience, to be selected by a sub-Committee of Operating Committee comprising a representative each of the Working Interest Owner(s) hereinafter referred as (Audit Committee) subject to the condition that guidelines issued by the Government from time to time would be followed in the matters connected with the appointment of auditors and the scope of work of the audits. The selection must be made by consensus of all members of the Audit Committee. The firm selected must demonstrate its qualifications in joint venture auditing and independence from all parties involved to the satisfaction of all members of the Audit Committee. In addition, once selected, a firm can only perform this audit for a period of not more than three consecutive Calendar Years. The selected firm will submit a detailed audit plan (including but not limited to procedure for physical verification of inventories) for approval before commencement of the aforementioned audit. The audit will commence not more than 90 Days from end of audit year and be completed within 180 Days from the end of the aforementioned audit year. Copies of the audited accounts and report shall be delivered to THE PRESIDENT and to each of the Working Interest Owner(s). The cost of the audit shall be charged to the Joint Account.
